Swi SSne SS

Aus dem selben Holz – die Schweiz und Kronoswiss®

Für Kronoswiss-Produkte gilt: Wo Schweiz draufsteht, muss auch Schweiz drin sein. Das Herkunftszeichen «Schweizer Holz» deklariert die bevorzugte Verwendung von einheimischem Holz zur Herstellung unserer Späne und Fasern. Es handelt sich um Frischholz aus den Wäldern sowie Restholz wie Sägespäne, Schwarten und Spreissel.

Wie die Schweiz steht auch die Kronospan Schweiz AG für ein ausgeprägtes Umwelt- und Gesundheitsbewusstsein sowie für traditionelle Werte in Verbindung mit Innovation. Diese Eigenschaften zeigen sich vor allem in unseren weltweit führenden, ressourcenschonenden Produktionstechnologien und den daraus resultierenden Qualitätsprodukten.

Swi SSne SS

La Svizzera e Kronoswiss® – fatte dello stesso legno

Quando i prodotti Kronoswiss recano la dicitura «Svizzera», allora la Svizzera deve essere contenuta in quei prodotti. L'indicazione di provenienza «Legno svizzero» dichiara l'utilizzo privilegiato di legno svizzero per la produzione di trucioli e fibre. Si tratta sia di legno nuovo proveniente dalle foreste che di scarti di legno residuo come limatura, pezzi di corteccia e schegge.

Come la Svizzera, anche la Kronospan Schweiz AG rappresenta una spiccata consapevolezza delle tematiche dell'ambiente e della salute, nonché dei valori tradizionali che vengono intrecciati all'innovazione. Queste qualità si riflettono soprattutto nelle nostre tecnologie di produzione leader a livello mondiale a basso uso di fattori produttivi, e nei prodotti di qualità che ne risultano.

Swi SSne SS

Les mêmes valeurs – la Suisse et Kronoswiss®

La règle est la même pour tous les produits de Kronoswiss: s'il y a écrit suisse à l'extérieur, il faut que ce soit suisse à l'intérieur. Le certificat d'origine «bois suisse» atteste la préférence d'un bois d'origine suisse pour la fabrication de nos agglomérés et fibres. Il est question de bois frais issu de forêts ainsi que de résidus de bois tels que sciures, déchets d'ébranchage et déchets de coupe.

Au même titre que la Suisse, Kronospan Suisse SA s'engage en faveur de la sensibilisation aux questions de l'environnement et de la santé de même qu'en faveur des valeurs traditionnelles en combinaison avec l'innovation. Ces caractéristiques se reflètent avant tout dans nos technologies de production numéro un dans le monde, qui permettent d'économiser les ressources, ainsi que dans les produits de qualité qui en résultent.

Swi SSne SS

From the same wood – Switzerland and Kronoswiss®

With Kronoswiss products you can be sure: if it says Switzerland, Switzerland also has to be in it. The mark of origin «Swiss Wood» declares the preferential utilisation of indigenous wood for production of our chips and fibres. This involves fresh timber from the forests as well as residual wood such as sawdust, slabs and splinters.

Like Switzerland, Kronospan Switzerland Ltd. also stands for a distinct environmental and health consciousness as well as for traditional values in conjunction with innovation. These attributes become obvious above all in our worldwide leading, resource-sparing production technologies and the subsequently resulting quality products.

ÖKOLOGIE

Kreislauf der Natur

Ökologie ist eine Grundeinstellung, die all unsere Entscheidungen beeinflusst. Projekte in Infrastruktur und Logistik planen wir deshalb langfristig und beziehen Behörden, Umweltverbände und unsere Nachbarschaft frühzeitig mit ein.

Mit der Zertifizierung unseres Umweltmanagement-Systems haben wir ein Instrument eingeführt, um den Ressourcenverbrauch kontinuierlich zu optimieren. Alle Rohstoffe werden möglichst vollständig verwertet. Erst nach der umfassenden stofflichen Verwertung folgt die energetische Nutzung. Der gesamte Stoffhaushalt der Kronospan Schweiz AG folgt diesem natürlichen Kreislauf.

ÉCOLOGIE

Cycle de la nature

L'écologie est une idée fondamentale qui influence toutes nos décisions. En conséquence, nous élaborons des projets d'infrastructure et de logistique sur le long terme et incluons de manière précoce les autorités, les associations de protection de l'environnement et notre voisinage.

Avec la certification de notre système de management de l'environnement, nous avons mis en place un instrument permettant d'améliorer continuellement la consommation des ressources. Toutes les matières premières sont entièrement recyclées dans la mesure du possible. L'exploitation de l'énergie n'a lieu que lorsque toutes les matières ont été recyclées. Le bilan des matières de Kronospan Suisse SA s'aligne sur ce cycle naturel.

ECOLOGIA

Il ciclo della natura

L'ecologia è un fattore di base che influenza tutte le nostre decisioni. Per questo programiamo progetti concernenti infrastrutture e logistica sul lungo termine, e vi coinvolgiamo con largo anticipo autorità, associazioni ambientali e vicinato.

Con la certificazione del nostro sistema di gestione ambientale abbiamo introdotto uno strumento che permette di ottimizzare continuamente il consumo di risorse. Tutte le materie prime vengono utilizzate nella maniera più completa possibile. Soltanto dopo il totale sfruttamento dei materiali si arriva all'utilizzo dell'energia. L'intera gestione dei materiali della Kronospan Schweiz AG segue questo ciclo naturale.

ECOLOGY

The cycle of nature

Ecology is a fundamental approach which influences all of our decisions. This is why we plan infrastructure and logistics projects over the long term and involve authorities, environmental associations and our neighbourhood from the beginning.

With the certification of our environmental management system we have introduced an instrument for continuously optimizing our consumption of resources. All raw materials are recycled as far as it is possible. Its use for the production of energy first occurs subsequent to full material recovery. The full resource management of Kronospan Switzerland Ltd. follows this natural cycle.
